TO WHOM IT MAY CONCERN:

RE: Dr Andre Du Plessis

I have worked with Dr A Du Plessis as his Head of Programme: ACE School Leadership. He was involved in the teaching of Basic Computer Literacy for School Principals. This was a very challenging job as some of the principals had never touched a computer mouse in all their lives. This is where Dr Du Plessis' passion for teaching and caring came through. He gave the students multiple opportunities to learn and be skilled. When they completed the module, they took the skill back to their schools thereby contributing to school improvement and efficient functioning. One student came to me excited that she had bought a computer – a thing that had never crossed her mind before.

With regard to his work ethic, he is a consistent diligent worker who gets things done timeously. He was a real pleasure to work with. I never had to breathe down his neck to submit his marks on due dates.

With regard to his relationships with students, he consistently gave me regular feedback about each student. This gave me the impression that he was interested in individual students and their progress and well-being.

I can readily recommend him for any opportunity that comes his way.
